- Full stack web developer with extensive knowledge in front end development skill and technology including HTML, CSS frameworks, Javascript, jQuery and React.
- Experienced in creating backend routes using Node and Express, utilizing MySQL and MongoDB database to store application data.
- Well organized, and able to work both independently and within a team.
- Possess ability to manage time and prioritize tasks effectively to meet project's deadline.
- Passionate about creating responsive, interactive and user-friendly websites and web applications.

TECHNICAL SKILLS

Languages: Javascript
Frontend: React, React Hooks, Bootstrap, Materialize, Tailwind, jQuery, Balsamiq
Backend: Node, Express, Sequelize, Mongoose
Database: MySQL, MongoDB
Tools: Github, Heroku, Visual Studio Code, MySQL Workbench, Handlebars

PROJECTS

Employee Directory | employeedirectory-062020.herokuapp.com/
- **Description:** This web application allows employers to have quick access to their employees' information. Sorting and filtering functionalities are available.
- **Responsibility**: Created a React application with multiple components to render employee information and set up page layout using Bootstrap.
- **Technology**: React, Bootstrap, Heroku.

Restaurant Reservation App | restaurantreservation-042020.herokuapp.com/
- **Description:** An online application for customers to make reservations, check the status of their reservation and waitlist.
- **Responsibility**: Designed the web page using Bootstrap and configured backend routes using Express to add and delete reservation information.
- **Technology**: HTML, Materialize, Node, Javascript.

Daily Schedule | demiwu96.github.io/Daily_Schedule/
- **Description:** A single page application that lets users manage their workday schedule.
- **Responsibility**: Created application layout using Bootstrap and frontend logic using Javascript and jQuery.
- **Technology**: HTML, CSS, Bootstrap, Javascript, jQuery.

Joboost | joboost.herokuapp.com
- **Description**: An online job board that allows employers to create, edit, and delete job posts and manage incoming applicants for each post. Job seekers on Joboost's platform can search job posts based on keyword, industry and/or location.
- **Responsibility**: Designed pages' mockup with Balsamiq and created user interface using Materialize, Javascript and Tailwind.
- **Technology**: HTML, Materialize, Handlebars, Tailwind, Balsamiq.

Budget Your Budget | demiwu96.github.io/Budget-your-budget/
- **Description:** This application lets users create financial budgets and set realistic saving goals based on their spending preference.
- **Responsibility**: Designed basic layout of the webpage, wrote code to validate user inputs and add new spending categories.
- **Technology**: HTML, Materialize, Javascript.
